2 days course

Dr. Costantino Vignato
Dr. Giuseppe Vignato
Odt. Riccardo Finotello

ABSTRACT

QUICK&EASY is the simplest and fastest procedure to realize a FULL ARCH rehabilitation on implant with high standard quality.

QUICK because Prama allows an ANATOMIC SURGERY which adapts to the shape of crestal bone. Furthermore, thanks to the RAMPA EFFECT, soft tissue heals very fast sealing the implant around the neck.

EASY because Prama doesn't use MUA (multi-unit abutments) but instead only straight abutment without shoulder and a titanium milled bar to support the final restoration.

QUICK&EASY procedure could be performed by using an analogical approach or using digital workflow. To learn the QUICK&EASY procedure achieving terrific results, you only need our two days course in which we will share clinical cases starting from the data collecting to the final restoration.

KEYWORDS

BIOLOGIC SPACE
RAMPA EFFECT
DIGITAL WORKFLOW

STRAIGHT ABUTMENT
DYNAMIC SCREW
MUA FREE

ANATOMIC SURGERY
SCREW RETAINED
TITANIUM MILLED BAR

SCIENTIFIC PROGRAM

DAY 1

- QUICK&EASY procedure
- Why PRAMA works?
- Which PRAMA use: neck 1.8-2.8-3.8 mm
- Bone Level o B-SPACE
- How to collect the clinical data
- Digital workflow vs traditional style
- Real Guide: how to project a surgical template
- Case discussion
- Tutorial videos

DAY 2

- Hands-on on Prama
- Video surgery :description and discussion
- Tutorial videos on the prosthesis
- Questions and answers

DEDICATED TO THE LAB TECHNICIANS

The program for the technician will share common moments with the dentist and dedicated lessons from the surgery aspect to the temporary e final restoration

END OF THE COURSE
